CHAPTER 8
SIGNS

Section 8.1 General Intent

The purpose and intent of this Section is to support and complement the various land uses allowed in the Badin area by the adoption of policies and regulations concerning the placement of signs.

The Badin Council does hereby find and declare that the outdoor placement of signs is a legitimate use of private property but that the erection of signs should be controlled and regulated in order to promote the health, safety, welfare and convenience and enjoyment of travel on and protection of the public investment in streets and roads in the Badin area and to promote the reasonable, orderly and effective display of such signs, displays and devices. It is also the intent of this Section to prevent signs from dominating the visual appearance of the area in which they are located and to enhance the aesthetic environment of the Badin area.

Section 8.2 Sign Illumination

A. The letter "N" means that the sign shall not be lighted.

B. The letter "L" means that the sign may be illuminated.

C. All lighted signs shall have their lighting directed in such a manner as to illuminate only the face of the sign.

D. No commercial sign (other than a ground-mounted sign) within 100 linear feet of a pre-existing residential structure may be illuminated between the hours of 12:00 midnight and 6:00 a.m. A residence shall be deemed "pre-existing" for purposes of this Section if it has a valid building permit in effect for construction of said structure or if construction of said structure was complete on or prior to the effective date of this provision.

Section 8.3 Unsafe Signs

Any sign which is determined by the Zoning Administrator as being insecure, in danger of falling or otherwise endangering the public safety shall be immediately removed by its owner unless it is repaired and made to otherwise comply with the requirements of this Ordinance.

Section 8.4 Sign Area

The surface area of a sign is computed as including the entire area within a parallelogram, triangle, circle, semi-circle or other regular geometric figure, including all of the elements of the display, but not including blank masking (a plain strip, bearing no advertising matter around the edge of a sign), frames, display of identification or licensing officially required by any governmental body, or structural elements outside the sign surface and bearing no advertising matter. In the case of signs mounted back-to-back, only one side of the sign is to be included in the area. Otherwise, the surface area of each sign is to be separately computed. In the case of cylindrical signs, signs in the shape of cubes, or other signs which are substantially three-dimensional with respect to their display surfaces, the entire display surface or surfaces is included in computations of area. See next page for examples.

In the case of embellishments (display portions of signs extending outside the general display area), surface area extending outside the general display area and bearing advertising material is to be computed separately (according to the method described immediately above in this Section) as part of the total surface area of the sign. If a sign is attached to an entrance wall or fence, only that portion of that wall or fence onto which the sign face or letters are placed shall be calculated in the sign area onto which the sign face or letter.

EXAMPLES OF HOW SIGN AREA IS TO BE COMPUTED ARE INDICATED BELOW:
The height of a sign shall be measured from the highest point of a sign to the point of ground surface beneath it.

Section 8.6 Permit Required

Except as otherwise provided in Section 8.7 of this Ordinance, it shall be unlawful for any person to erect, construct, enlarge, move or replace any sign or cause the same to be done, without first having obtained a sign permit for such sign from the Zoning Administrator as required by this Ordinance. A fee, in accordance with a fee schedule adopted by the Town Council, shall be charged for each sign permit issued.

Notwithstanding the above, changing or replacing the copy on an existing lawful sign shall not require a permit, provided the copy change does not change the nature of the sign such as to render the sign in violation of this Ordinance.

Section 8.7 Signs Not Requiring Permit

3. Canopy and awning signs may be substituted for part or all of the allowable wall signage per premises. Signs may be painted or printed onto a canopy or awning. In no instance shall a canopy or awning sign extend into a street right-of-way. This paragraph shall not apply to the C-B District. For canopy and awning sign regulations for the C-B District see Section 8.10.

4. A projecting sign may be substituted for part or all of the allowable wall signage per premises. A projecting sign shall not project more than four feet from a building. In no instance shall a projecting sign extend into a street right-of-way.

8.12.2 Free-Standing Signs

1. All free-standing signs shall be located behind and not extend into the street right-of-way, except as provided elsewhere in this Ordinance. All signs greater than two and one-half (2-1/2) feet in height as measured from the grade of the road or having a vertical clearance of less than ten (10) feet shall be located a minimum of five (5) feet behind the street right-of-way (unless a greater setback is provided elsewhere in this Ordinance).

8.12.3 Supplemental Directory/Directional Signs

In order to maintain the flow of traffic on arterial and collector roads and to promote vehicular safety, emphasis is made to limit the number of ingress and egress points off of such roads. In order to direct attention to planned multi-tenant developments which are
not directly accessible off of such roads and where on-premise signage for that development (or any tenants within the development) would not otherwise be visible by the motorists traveling on nearby arterial or collector roads, provisions are made to provide directory signs which identify the name of the particular development and/or the names of their tenants. Such signs would be supplemental to signage otherwise provided for such developments.

For any shopping center, office park, industrial park, or similar planned multi-tenant nonresidential development, supplemental directory/directional signs may be erected under the following conditions:

1. Access to the development is made only through a local street. There shall no direct points of ingress and egress to the development off an arterial or collector road.

2. A maximum of two supplemental directory/directional signs per development shall be allowed. No two signs shall be allowed closer than five-hundred (500) feet to each other using the closest straight line measurement.

3. No such sign shall be placed within a road right-of-way nor within five (5) feet of said right-of-way. All such directory signs shall be ground-mounted.

4. The sign may contain the name of the development, a map of the development, names of tenants within the development, directional arrows and distance information.

5. The size of each directory sign shall be a function of the number of tenants within the development. Each such sign may initially contain an area of forty (40) square feet or ten (10) square feet per principal use within the development, whichever is greater, with a maximum area of eighty (80) square feet.

6. Such signs may be placed on or off-premises. All such signs shall be constructed and located, however, so as to be visible by the motorist traveling on the arterial or collector road which intersects with the local road providing access to the development.

7. Such signs shall not exceed a height of twenty (20) feet.
